3 Talon Contexts

Table 10: 1password

password new	New password.
password dup	Duplicate password.
password edit	Edit password.
password delete	Delete password.

Table 11: 1password Global

password fill	fill the password.
password show	show the password.

Table 12: Amethyst

window next	Press alt-shift-j.
window previous	Press alt-shift-k.
window full	Press alt-shift-d.
window tall	Press alt-shift-a.
window middle	Press alt-shift-'.
window move main	Press alt-shift-enter.
window grow	Press alt-shift-l.
window shrink	Press alt-shift-h.
window reevaluate	Press alt-shift-z.

Table 13: Anaconda

anaconda	Insert "conda".
anaconda help	Insert "conda $-\text{help} \setminus n$ ".
anaconda version	Insert "conda $-$ version \setminus n".
anaconda environment list	Insert "conda env list\n".
anaconda environment create	Insert "conda env create -f ".
anaconda environment re-	Insert "conda env remove -n
move	".
anaconda activate	Insert "conda activate ".
anaconda clean	Insert "conda clean ".
anaconda compare	Insert "conda compare ".
anaconda config	Insert "conda config ".
anaconda create	Insert "conda create ".
anaconda info	Insert "conda info ".
anaconda init	Insert "conda init ".
anaconda install	Insert "conda install".
anaconda list	Insert "conda list ".
anaconda package	Insert "conda package ".
anaconda remove	Insert "conda remove ".
anaconda uninstall	Insert "conda uninstall".
anaconda run	Insert "conda run ".
anaconda search	Insert "conda search ".
anaconda update	Insert "conda update ".
anaconda upgrade	Insert "conda upgrade ".
anaconda build	Insert "conda build ".
anaconda convert	Insert "conda convert ".
anaconda debug	Insert "conda debug ".
anaconda develop	Insert "conda develop ".

anaconda environment	Insert "conda env ".
anaconda index	Insert "conda index ".
anaconda inspect	Insert "conda inspect ".
anaconda metapackage	Insert "conda metapackage ".
anaconda render	Insert "conda render ".
anaconda server	Insert "conda server ".
anaconda skeleton	Insert "conda skeleton ".
anaconda verify	Insert "conda verify ".

Table 14: $\mathbf{Discord}$

[channel] mentions last	Go up to channel with un-
	read mentions.
[channel] mentions next	Go down to channel with un-
	read mentions.
oldest unread	Go to oldest unread message.
toggle pins	Toggle pins popout.
toggle inbox	Toggle inbox popout.
toggle (members member	Toggle channel member list.
list)	
pick emoji	Toggle emoji picker.
pick (jif gif gift)	Toggle gif picker.
mark inbox channel read	Mark top inbox channel read.
[toggle] (mute unmute)	Toggle mute.
[toggle] (deafen undeafen)	Toggle deafen.
answer call	Answer incoming call.
decline call	Decline incoming call.

Table 15: File Manager

	g
title force	Refreshes the title to match
	current directory. this is
	for e.g. windows command
	prompt that will need to do
	some magic
manager show	Shows the pickers.
manager refresh	Forces an update of the lists
	(e.g., when file or folder cre-
	ated).
go desk	expands and opens the user
	directory.
go docks	expands and opens the user
	directory.
go downloads	expands and opens the user
	directory.
go pictures	expands and opens the user
	directory.
go profile	expands and opens the user
	directory.
go talon home	opens the directory that's al-
	ready visible in the view.
go talon user	opens the directory that's al-
	ready visible in the view.
go user	opens the directory that's al-
	ready visible in the view.

go back	file manager go forward di	ristosource	Insert "list\n".
go forward	file manager go forward di		Insert "info source\n".
(go parent daddy)	file manager open parent.	print	Insert "p ".

Table 18: Generic Browser

(address bar go address go	Focus address bar.
url)	
(address copy url copy	Focus address bar. Copy se-
copy address copy url)	lection to clipboard.
go home	Go to home page.
[go] forward	Go forward in the history.
go (back backward)	Go back in the history.
go to { user.website }	Go to a new URL.
go private	Open a private browsing win-
	dow.
bookmark it	Bookmark the current page.
bookmark tabs	Bookmark all open tabs.
(refresh reload) it	Reload current page.
(refresh reload) it hard	Reload current page
	(harder).
bookmark show	Open the Bookmarks editor.
bookmark bar [show]	Toggle the bookmarks bar.
downloads show	Show download list.
extensions show	Show installed extensions.
history show	Show recently visited pages.
cache show	Show 'Clear Cache'dialog.
dev tools [show]	Open or close the developer
	tools.
show downloads	Show download list.
show extensions	Show installed extensions.
show history	Show recently visited pages.
show cache	Show 'Clear Cache'dialog.

Table 19: Generic Debugger

step into	Step into an instruction in
	the debugger.
step over	Step over an instruction in
	the debugger.
step line	Step into a source line in the
	debugger.

step over line	Step over a source line in the
	debugger.
step out	Step until function exit in the
	debugger.
continue	Continue execution in the de-
	bugger.
debug start	Start debugging.
debug stop	Stop the debugger.
debug exit	Exit the debugger.
debug detach	Detach the debugger.
debug restart	Restart execution in the de-
	bugger.
show registers	Print the current registers in
	the debugger.
get register	Print specific register in the
	debugger.
set register	Set specific register in the de-
	bugger.
break now	Break into the debugger.
break here	Set a break on the current
(1: + 1) (1 1 1 1	line.
(list show) (breaks break	Print the current breakpoints
points)	in the debugger.
(set add) (break break	Add one software breakpoint
point)	in the debugger. Add one hardware break-
(set add) hardware (break	
break point) clear all (breaks break	point in the debugger. Clear all breakpoints in the
points)	debugger.
clear (break break point)	Clear one breakpoint in the
crear (srear srear point)	debugger.
clear (break break point)	Clear one breakpoint id in
<number small=""></number>	the debugger.
disable all (breaks break	Disable all breakpoints in the
points)	debugger.
disable (break break point)	Disable one breakpoint in the
	debugger.
disable (break break point)	Disable one breakpoint id in
<number_small></number_small>	the debugger.
enable all (breaks break	Enable all breakpoints in the
points)	debugger.
enable (break break point)	Enable one breakpoint in the
	debugger.
enable (break break point)	Enable one breakpoint id in
<number_small></number_small>	the debugger.
(stack back) trace	Print a back trace in the de-
11	bugger.
disassemble	Preps the disassemble com-
1: 11 1	mand in the debugger.
disassemble here	Disassembles instructions
	at the current instruction
1. 11 1. 1	pointer.
disassemble clipboard	Disassemble instructions at
	an address in the clipboard.

jump to address	Jump to a specific address in
	the debugger.
jump to clipboard	Jump to a specific address
	stored in the clipboard.
jump to highlighted	Jump to a specific high-
	lighted address in the debug-
	ger.
dump string	Display as specific address as
	an ascii string in the debug-
	ger.
dump unicode [string]	Display as specific address as
	an unicode string in the de-
	bugger.
dump pointers	Display as specific address as
	a list of pointers in the de-
	bugger.
list modules	List the loaded modules in
	the debuggee memory space.
inspect type	Inspect a specific data type
	in the debugger.
clear line	Clear unwanted data from
	the command line.

Table 20: $\mathbf{I3wm}$

port <number_small></number_small>	execute a command on the
	system.
port ten	execute a command on the
_	system.
(port flip flipper)	execute a command on the
	system.
port right	execute a command on the
	system.
port left	execute a command on the
	system.
(win window) left	execute a command on the
	system.
(win window) right	execute a command on the
	system.
(win window) up	execute a command on the
	system.
(win window) down	execute a command on the
	system.
((win window) kill murder)	execute a command on the
	system.
(win window) stacking	execute a command on the
	system.
(win window) default	execute a command on the
	system.
(win window) tabbed	execute a command on the
	system.
reload i three config	execute a command on the
	system.
restart i three	execute a command on the
	system.

(full screen scuba)	execute a command on the
	system.
toggle floating	execute a command on the
	system.
focus floating	execute a command on the
	system.
center window	execute a command on the
	system.
resize mode	execute a command on the
	system.
focus parent	execute a command on the
	system.
focus child	execute a command on the
	system.
grow window	execute a command on the
	system. Press right:10. Press
	down:10. Press escape. exe-
	cute a command on the sys-
	tem.
shrink window	execute a command on the
	system. Press left:10. Press
	up:10. Press escape. execute
	a command on the system.
horizontal (shell terminal)	execute a command on the
,	system. Launch a shell.
vertical (shell terminal)	execute a command on the
	system. Launch a shell.
(shuffle move (win window)	execute a command on the
[to] port) < number small>	system.
(shuffle move (win window)	execute a command on the
[to] port ten)	system.
(shuffle move (win window)	execute a command on the
[to] last port)	system.
(shuffle move (win window)	execute a command on the
left)	system.
(shuffle move (win window)	execute a command on the
right)	system.
(shuffle move (win window)	execute a command on the
up)	system.
(shuffle move (win window)	execute a command on the
down)	system.
(win window) horizontal	execute a command on the
()	system.
(win window) vertical	execute a command on the
(Will William) versions	system.
make scratch	execute a command on the
mano seraten	system.
(show hide) scratch	execute a command on the
[(Show mee)] sereten	system.
next scratch	execute a command on the
near serarch	system. execute a command
	on the system.
launch	Trigger the i3 launcher: ex
iadifoli	rofi.
	1011.

launch <user.text></user.text>	Trigger the i3 launcher: ex
	rofi. Insert " $<$ text $>$ ".
lock screen	Trigger the i3 launcher: ex
	rofi.
(launch shell koopa)	Launch a shell.
new scratch (shell window)	Launch a shell. execute a
	command on the system. ex-
	ecute a command on the sys-
	tem.

grab window clip		Takes a screenshot of the ac-
		tive window and saves it to
		the clipboard.

Table 92: **Splits**

split right	Move active tab to right split.
split left	Move active tab to left split.
split down	Move active tab to lower
	split.
split up	Move active tab to upper
	split.
split (vertically vertical)	Splits window vertically.
split (horizontally horizon-	Splits window horizontally.
tal)	
split flip	Flips the orietation of the ac-
	tive split.
split window	Splits the window.
split clear	Clears the current split.
split clear all	Clears all splits.
split next	Goes to next split.
split last	Goes to last split.
go split <number></number>	Navigates to a the specified
	split.

Table 93: **Tabs**

tab (open new)	Open a new tab.
tab (last previous)	Switch to previous tab for
	this window.
tab next	Switch to next tab for this
	window.
tab close	Closes the current tab.
tab (reopen restore)	Re-open the last-closed tab.
go tab < number>	Jumps to the specified tab.
go tab final	Jumps to the final tab.

Table 94: **Talon Helpers**

talon check updates	Check for updates.
talon open log	Open Talon log.
talon open rebel	Open Talon REPL.
talon home	Open Talon config folder.
talon copy context pie	Adds os-specific context info
	to the clipboard for the
	focused app for .py files.
	Assumes you've a Module
	named mod declared

talon copy context	Adds os-specific context info
	to the clipboard for the fo-
	cused app for .talon files.
talon copy name	Let <name> be active app's</name>
	name. Set clipboard text.

Table 105: Line Commands

lend	Move cursor to end of line.
bend	Move cursor to start of line.
go <number></number>	Move cursor to line <n>.</n>
go <number> end</number>	Move cursor to line $\langle n \rangle$.
	Move cursor to end of line.
comment [line] < number>	Selects lines from line_start
	to line line_end. Toggle com-
	ments on the current line(s).
comment <number> until</number>	Selects lines from line_start
<number></number>	to line line_end. Toggle com-
	ments on the current line(s).
clear [line] < number>	Move cursor to line $\langle n \rangle$. Se-
	lects lines from line_start to
	line line_end. Delete selec-
	tion.
$\overline{\mathrm{clear} < \mathrm{number} > \mathrm{until} < \mathrm{num-}}$	Selects lines from line_start
ber>	to line line_end. Delete se-
	lection.
copy [line] < number>	Selects lines from line_start
	to line line_end. Copy selec-
	tion to clipboard.
copy < number > until < num-	Selects lines from line_start
ber>	to line line_end. Copy selec-
	tion to clipboard.
cut [line] < number>	Selects lines from line_start
	to line line_end. Cut selec-
	tion to clipboard.
cut [line] <number> until</number>	Selects lines from line_start
<number></number>	to line line_end. Cut selec-
	tion to clipboard.

(neste venlese) < number>	Selects lines from line start
(paste replace) <number> until <number></number></number>	to line line end. Paste clip-
until < number >	board at cursor.
(select cell sell) [line]	Selects lines from line start
<number></number>	to line line_end.
(select cell sell) < number>	Selects lines from line start
until < number >	to line line end.
tab that	Add a tab stop of indenta-
tab that	tion.
tab [line] < number>	Move cursor to line $\langle n \rangle$.
tas [mej (numser)	Add a tab stop of indenta-
	tion.
tab < number > until < num-	Selects lines from line start
ber>	to line line end. Add a tab
	stop of indentation.
retab that	Remove a tab stop of inden-
	tation.
retab [line] < number>	Selects lines from line start
. ,	to line line end. Remove a
	tab stop of indentation.
retab <number> until</number>	Selects lines from line_start
<number></number>	to line line_end. Remove a
	tab stop of indentation.
drag [line] down	Swap the current line with
	the line below.
drag [line] up	Swap the current line with
	the line above.
drag up [line] <number></number>	Selects lines from line_start
	to line line_end. Swap the
	current line with the line
1	above.
drag up <number> until</number>	Selects lines from line_start
<number></number>	to line line_end. Swap the
	current line with the line
drag down [line] < number>	above.
drag down [nne] < number >	Selects lines from line_start
	to line line_end. Swap the current line with the line be-
	low.
drag down < number > until	Selects lines from line_start
<number></number>	to line line end. Swap the
	current line with the line be-
	low.
clone (line that)	Create a new line identical to
	the current line.

$<$ user.code_libraries $>$	tions the cursor appropri-
	ately. Press end enter.
from import	Insert "from import ". Press
	left. Move cursor left one
	word. Press space. Move cur-
	sor left one column.

Table 128: ${f R}$

(op is) in	Insert "%in% ".
toggle library	GUI: List libraries for active
	language.
library	Inserts a library and posi-
$<$ user.code_libraries $>$	tions the cursor appropri-
	ately. Press end enter.
(chain pipe that)	Press end. Insert "%> %".
	Press enter.
state na	Insert "NA".
function define <user.text></user.text>	Inserts private function dec-
	laration.
named arg {	Inserts a named argument.
user.code_parameter_name	
}	

Table 129: Ruby

args pipe	Insert " ". Press left.
dock string	Inserts a document comment
	and positions the cursor ap-
	propriately.
state end	Insert "end".
state begin	Insert "begin".
state rescue	Insert "rescue ".

state module	Insert "module ".
instance <user.text></user.text>	Insert "@". inserts properly
	formatted private function
	name.

Table 130: **Typescript**

Insert "=== ".
Insert "!== ".
Insert "const ".
Insert "let ".
Insert "var ".
Insert "async ".
Insert "await ".
Insert ".map()". Press left.
Insert ".filter()". Press left.
Insert ".reduce()". Press left.
Insert "".
Insert "from """. Press left.

Table 131: Standard

zoom in	Zoom in.
zoom out	Zoom out.
scroll up	Move cursor up one page.
scroll down	Move cursor down one page.
copy (it that)	Copy selection to clipboard.
cut (it that)	Cut selection to clipboard.
paste (it that)	Paste clipboard at cursor.
nope	Undo.
redo that	Redo.
paste match	Paste clipboard without style
	information.
file save	Save current document.
wipe	Press backspace.
(pad padding)	Insert "". Press left.
slap	Insert line below cursor.

Table 132: \mathbf{Git}

git edit config	Insert "git config —local -
sit along alipheand	e\n".
git clone clipboard	Insert "git clone ". Paste clip-
mit diff himblimbt - 1	board at cursor. Press enter.
git diff highlighted	Copy selection to clipboard.
	Insert "git diff". Paste clip-
	board at cursor.

git diff clipboard	Insert "git diff". Paste clip-
	board at cursor.
git add highlighted	Copy selection to clipboard.
	Insert "git add ". Paste clip-
	board at cursor.
git add clipboard	Insert "git add ". Paste clip-
	board at cursor.
git commit highlighted	Copy selection to clipboard.
	Insert "git add ". Paste
	clipboard at cursor. Insert
	"\ngit commit\n".

Table 133: Wake Up

welcome back	Enable control mouse, zoom
	mouse, and disables cursor.
	Enables the history. For win-
	dows and Mac with Dragon,
	enables Talon commands and
	Dragon's command mode
sleep all [<phrase>]</phrase>	Hides list of running applica-
	tions. Disables the history.
	Hides the homophones dis-
	play. Hides the help. Dis-
	ables control mouse, zoom
	mouse, and re-enables cur-
	sor. Disable speech recogni-
	tion. Sleep the engine.
drowse [<phrase>]</phrase>	Disable speech recognition.
wake up	Enable speech recognition.

Table 134: Cheatsheet

print [html] help	Print out a help document
	of all Talon commands as
	HTML.
print latex help	Print out a help document of
	all Talon commands as TeX.
