Table 14: $\mathbf{Discord}$

[channel] mentions last	Go up to channel with un-
	read mentions
[channel] mentions next	Go down to channel with un-
	read mentions
oldest unread	Go to oldest unread message
toggle pins	Toggle pins popout
toggle inbox	Toggle inbox popout
toggle (members member	erToggle channel member list
list)	
pick emoji	Toggle emoji picker
pick (jif gif gift)	Toggle gif picker
mark inbox channel read	Mark top inbox channel read
toggle (mute unmute)	Toggle mute
[toggle] (deafen undeafen)	Toggle deafen
answer call	Answer incoming call
decline call	Decline incoming call

Table 15: File Manager

	_
title force	Refreshes the title to match
	current directory. this is
	for e.g. windows command
	prompt that will need to do
	some magic.
manager show	Shows the pickers
manager refresh	Forces an update of the lists
	(e.g., when file or folder cre-
	ated)
go desk	Expands and opens the user
	directory
go docks	Expands and opens the user
	directory
go downloads	Expands and opens the user
	directory
go pictures	Expands and opens the user
	directory
go profile	Expands and opens the user
	directory
go talon home	Opens the directory that's al-
	ready visible in the view
go talon user	Opens the directory that's al-
	ready visible in the view
go user	Opens the directory that's al-
	ready visible in the view

Table 18: Generic Browser

(address bar go address g	oFocus address bar
(address copy url copy	Focus address bar
copy address copy url)	Copy selection to clipboard
go home	Go to home page
[go] forward	Go forward in the history
go (back backward)	Go back in the history
go to { user.website }	Go to a new url
go private	Open a private browsing win- dow
1 1 1 1	
bookmark it	Bookmark the current page
bookmark tabs	Bookmark all open tabs
(refresh reload) it	Reload current page
(refresh reload) it hard	Reload current page (harder)
bookmark show	Open the bookmarks editor
bookmark bar [show]	Toggle the bookmarks bar
downloads show	Show download list
extensions show	Show installed extensions
history show	Show recently visited pages
cache show	Show 'clear cache'dialog
dev tools [show]	Open or close the developer
	tools
show downloads	Show download list
show extensions	Show installed extensions
show history	Show recently visited pages
show cache	Show 'clear cache'dialog

Table 19: Generic Debugger

step into	Step into an instruction in
	the debugger
step over	Step over an instruction in
	the debugger

step line	Step into a source line in the
	debugger
step over line	Step over a source line in the
	debugger
step out	Step until function exit in the
	debugger
continue	Continue execution in the de-
	bugger
debug start	Start debugging
debug stop	Stop the debugger
debug exit	Exit the debugger
debug detach	Detach the debugger
debug restart	Restart execution in the de-
	bugger
show registers	Print the current registers in
Silow registers	the debugger
get register	Print specific register in the
get register	debugger
set register	Set specific register in the de-
Set register	bugger
break now	Break into the debugger
break here	Set a break on the current
break here	line
(ligt show) (brooks brook	kPrint the current breakpoints
points)	in the debugger
	kAdd one software breakpoint
point)	in the debugger
, ,	Add one hardware break-
break point)	point in the debugger
	kClear all breakpoints in the
points)	debugger
clear (break break point)	Clear one breakpoint in the
	debugger
	Clear one breakpoint id in
<number_small></number_small>	the debugger
	kDisable all breakpoints in the
points)	debugger
disable (break break point)Disable one breakpoint in the
	debugger
	Disable one breakpoint id in
<number_small></number_small>	the debugger
enable all (breaks break	kEnable all breakpoints in the
points)	debugger
enable (break break point	Enable one breakpoint in the
	debugger
enable (break break point	Enable one breakpoint id in
$<$ number_small $>$	the debugger
(stack back) trace	Print a back trace in the de-
	bugger
disassemble	Preps the disassemble com-
-	mand in the debugger
disassemble here	Disassembles instructions
22020	at the current instruction
	pointer
	±

disassemble clipboard	Disassemble instructions at
	an address in the clipboard
jump to address	Jump to a specific address in
	the debugger
jump to clipboard	Jump to a specific address
	stored in the clipboard
jump to highlighted	Jump to a specific high-
	lighted address in the debug-
	ger
dump string	Display as specific address as
	an ascii string in the debug-
	ger
dump unicode [string]	Display as specific address as
	an unicode string in the de-
	bugger
dump pointers	Display as specific address as
	a list of pointers in the de-
	bugger
list modules	List the loaded modules in
	the debuggee memory space
inspect type	Inspect a specific data type
	in the debugger
clear line	Clear unwanted data from
	the command line

Table 20: 13wm

port <number_small></number_small>	Execute a command on the
	system
port ten	Execute a command on the
	system

wheel left here	Move the mouse cursor to the center of the currently active window Scrolls left

wheel tiny left	Scrolls left
wheel tiny left here	Move the mouse cursor to the
	center of the currently active
	window
	Scrolls left
wheel right	Scrolls right
wheel right here	Move the mouse cursor to the
	center of the currently active
	window
	Scrolls right
wheel tiny right	Scrolls right
wheel tiny right here	Move the mouse cursor to the
	center of the currently active
	window
	Scrolls right
curse yes	Shows the cursor
curse no	Hides the cursor
copy mouse position	Copy the current mouse po-
	sition coordinates

Table 82: Multiple Cursors

cursor multiple	Enables multi-cursor mode
cursor stop	Disables multi-cursor mode
cursor up	Adds cursor to line above
cursor down	Adds cursor to line below
cursor less	Removes selection & cursor
	at last occurrence
cursor more	Adds cursor at next occur-
	rence of selection
cursor skip	Skips adding a cursor at next
	occurrence of selection
cursor all	Adds cursor at every occur-
	rence of selection
cursor lines	Adds cursor at end of every
	selected line

Table 83: Repeater

<user.ordinals></user.ordinals>	Repeat the last command n
	times
<pre><number_small> tir</number_small></pre>	nes Repeat the last command n
	times
(repeat that twice)	Repeat the last command n
	times
repeat that	<num-repeat command="" last="" n<="" td="" the=""></num-repeat>
$ext{ber_small} > [times]$	times

Table 84: Screens

screen numbers	Show screen number on each
	screen

Table 85: Screenshot

grab screen	Takes a screenshot of the en-
	tire screen and saves it to the
	pictures folder.
grab screen	<num-takes a="" en-<="" of="" p="" screenshot="" the=""></num-takes>
$ber_small>$	tire screen and saves it to the
	pictures folder.
grab window	Takes a screenshot of the ac-
	tive window and saves it to
	the pictures folder
grab selection	Triggers an application is ca-
	pable of taking a screenshot
	of a portion of the screen
grab screen clip	Takes a screenshot of the en-
	tire screen and saves it to the
	clipboard.
grab screen	<num-takes a="" en-<="" of="" screenshot="" td="" the=""></num-takes>
ber small> clip	tire screen and saves it to the
	clipboard.
grab window clip	Takes a screenshot of the ac-
	tive window and saves it to
	the clipboard

Table 86: **Splits**

split right	Move active tab to right split
split left	Move active tab to left split
split down	Move active tab to lower split
split up	Move active tab to upper
	split
split (vertically vertical)	Splits window vertically
split (horizontally horizontally	n-Splits window horizontally
tal)	
split flip	Flips the orientation of the ac-
	tive split
split window	Splits the window
split clear	Clears the current split
split clear all	Clears all splits
split next	Goes to next split
split last	Goes to last split
go split < number>	Navigates to a the specified
	split

Table 87: Standard

zoom in	Zoom in
zoom out	Zoom out
scroll up	Move cursor up one page
scroll down	Move cursor down one page
copy that	Copy selection to clipboard
cut that	Cut selection to clipboard
paste that	Paste clipboard at cursor
undo that	Undo

redo that	Redo
paste match	Paste clipboard without style
	information
file save	Save current document
wipe	Press backspace
(pad padding)	" "
	Press left
slap	Insert line below cursor

Table 88: **Tabs**

tab (open new)	Open a new tab
tab (last previous)	Switch to previous tab for
	this window
tab next	Switch to next tab for this
	window
tab close	Closes the current tab
tab (reopen restore)	Re-open the last-closed tab
go tab <number></number>	Jumps to the specified tab
go tab final	Jumps to the final tab

Table 89: Talon Helpers
